

PENSTICK[®]*Digital* is a vinyl cling film for digital inkjet printing. **PENSTICK**[®]*Digital* can be printed with solvent, UV-cured and latex inks. When printed with solvent inks **PENSTICK**[®]*Digital* also adheres on the printed side. This makes it possible e.g., to apply advertising or decoration on the inside of a storefront.

Characteristics

- Adheres without adhesive to smooth, glossy surfaces
- Removable without leaving any residue
- Reusable
- Adheres on both sides (also on the printed side – solvent inks only)
- Good UV resistance; no color fading

Applications

PENSTICK[®]*Digital* is for example perfectly suited for temporary or long-term storefront decoration or advertising. The clear mat film has an effect of etched glass and could be used e.g. as blinds.

Product Overview Short Rolls

Product	Colour / Surface	Printability	Formats	Description
PENSTICK® Digital 4152 CLS	clear glossy	solvent inkjet, UV inkjet, Latex inkjet	914 mm x 25 m	static cling vinyl film 150 µm; Castline – cast-coated board 130 g/m ² liner; adheres on both sides*
			1.370 mm x 25 m

* when printed with solvent inks

PENSTICK[®]Flex is a laminate of PET and an S-PVC cling layer. **PENSTICK[®]Flex** has a high dimension stability, which makes it well suited for large format applications. **PENSTICK[®]Flex** can be printed with UV digital inks.

Characteristics

- adheres to smooth, glossy surfaces without adhesive
- easy to apply
- removable without residues
- good printability
- high dimension stability
- good UV-resistance

Applications

- large format advertising
- large format decorations
